ABOUT ME

Agile Coach and transformation leader with a proven track record of guiding IT organizations through team- and enterprise-level Agile adoption. Client-focused and deeply experienced in fostering high-performing, cross-functional teams that consistently deliver value through iterative feedback, technical excellence, and adaptive planning.

Leveraging hands-on experience as a **Software Developer, Scrum Master, and Product Owner**, I bridge gaps between engineering, product, and leadership, enabling authentic Agile maturity grounded in **XP engineering practices, outcome-based roadmapping, OKRs, story mapping, and release planning**. I specialize in addressing the cultural and systemic barriers that impede Agile success, from team dynamics to portfolio-level alignment.

Known for creating psychological safety, driving continuous improvement through effective retrospectives, and embedding sustainable engineering discipline within Agile delivery. Passionate about complex, mission-critical IT environments where agility, quality, and speed must coexist.

WORK EXPERIENCE

Project STEAM Dubai

IT Portfolio & Organizational Change Leader

01/04/2024 – Current

Results-driven professional operating at the intersection of IT portfolio management, organizational change, and Agile delivery. Experienced in aligning enterprise transformation with investment prioritization, ensuring initiatives are not only strategically sound but also human-ready.

- **Designed an Agile-integrated OCM framework** embedded into the IT delivery lifecycle, co-developed with stakeholders and customers using a standardized change glossary to ensure shared understanding and alignment with organizational needs. Change enablement is synchronized with sprint rhythms, release trains, and product increments.
- **Partnered with IT portfolio leadership** to embed change impact assessments, adoption metrics, and stakeholder readiness into initiative prioritization and charter readiness, elevating portfolio decisions.
- **Designed ITIL-aligned services** for Infrastructure and Security (Platform) teams, harmonizing operational stability with Agile delivery demands by embedding change readiness and **continuous planning** into service transition and continual improvement, enabling dynamic prioritization and faster response to evolving needs.
- **Facilitated cross-domain workshops** with delivery/feature teams to co-create adoption pathways, building shared ownership of change across value streams.
- **Cultivated enterprise change champion networks** within feature/delivery teams to sustain behavior change and feed real-time insights into portfolio and product backlogs.
- **Championed lean portfolio practices** by advocating for outcome-focused charters, reducing WIP through strategic prioritization, and enabling the transparent flow of initiatives from ideation to value realization.

SnappFood Tehran, Iran

Address Saeedi St, District 3, Tehran, Iran | **Website** <https://snappfood.ir/>

Agile Coach/Scrum Master

21/06/2021 – Current

- Performing as Scrum Master and Agile Leader to introduce Scrum, Agile at Scale transformation, Agile development, coaching, facilitating,

- teaching, and mentoring teams with one of the leading online food ordering companies in Iran.
- Assisting and coaching 3 tribes including 9 squads in defining, aligning, checking in, and closing OKRs.
- Coaching product owners and scrum masters to bring more agile ways of working to their teams.
- Coaching, and facilitating 2+ squads to learn agile practices including backlog refinement, story mapping, Definition of Done, Definition of Ready, Jira, retrospectives, estimation & velocity, Scrum/Kanban/Scrumban, OKRs, and continuous improvement.
- Led agile ceremonies including sprint planning, stand-ups, review, and retrospectives and coached in scrum/kanban methods across multiple squads.
- Ensuring timely, high-quality software products and outcome-oriented squads.
- Coaching 2 internal coaches.

Dotin Tehran, Iran

Address East Nahid, Nelson Mandela (Africa) Blvd., Tehran, Iran | **Website** <https://www.dotin.ir/en/>

Scrum Master

30/09/2019 – 21/06/2021

- Performed as Scrum Master to introduce Scrum, coaching development teams, and individuals in one of the biggest investment banks in Iran.
- Partner with Product Owners to ensure vision, roadmap, and personas are well-defined and understood.
- Acted as the servant-leadership for product development, including 2 Scrum teams, renewing and supporting an organizational transition to Agile.
- Coordinated all Scrum Ceremonies including Sprint Planning, Daily Standups, Sprint retrospectives, Sprint Review, Story Grooming, and Release Planning.
- Assisted Scrum teams in defining and deploying new product development processes and in facilitating the continuous improvement of existing processes.
- Increased team engagement, commitment & sustainable accountability.
- Provided reports for managers.
- Used Agile Tools such as JIRA, Confluence.

AppTech Tehran, Iran

Address Andishe , Beheshti street, 1569744114, Tehran, Iran | **Website** <https://app-tec.ir/>

Product Owner

31/12/2018 – 30/09/2019

- Managed and delivered the product's value for a social media platform that worked through analyzing & mining data.
- Identified requirements and users' expectations and developed a proposal strategy based on that.
- Worked directly with end-users and development teams to capture/ analyze challenges of the workflow and develop/modify system specifications (Act as a liaison between business and IT).
- Assisted Design and Development decompose business stories into system-level stories and/or designs.
- Owned and driven backlog grooming.
- Prioritized work within an agile team, created user stories and acceptance criteria.
- Maintained a backlog of future work for prioritization.
- Worked with Testing and Development during sprints to determine an appropriate level of acceptance testing. Reviewed the Increment Testing Plan (Reviewed test results and test plan).
- Provided artifacts such as Use Cases, User Stories, Business Process, and all artifacts related to the requirements.
- Provided key performance metrics to IT leaders on the deliveries and benefits realization of change implementations.
- Was responsible for the market, technology, and competitive research.
- Assisted marketing and documentation staff to support the product.

Tartu Ülikooli Tartu, Estonia

Address Ülikooli 18, 50090, Tartu, Estonia | **Website** <https://www.ut.ee/en>

Research and Development Engineer

31/08/2016 – 30/12/2018

- Studied various GUI test automation frameworks (such as Model-based, Data-driven, Keyword-driven, Behaviour-Driven) to develop GUI test automation tools.
- Worked with variant test automation tools including Selenium, GUITAR, Waitr, Watin to validate and verify the quality of software.
- Used, and analyzed quantitative data collected from the testing automation tools, for understanding software under test behavior (SUT).
- Collected, cleaned, provided models, and analyzed structured/ unstructured data.

- Interpreted data using statistical techniques (ML & Data mining techniques) using R, Python.
- Compiled and validated data; reinforced and maintained compliance with corporate standards.
- Being familiar with Hadoop ecosystem components (HDFS/HDFS, HBase, MapReduce).

Petraware Technologies Kuala Lumpur, Malaysia

Address No. 2, Level 21, Block 2A, Plaza Sentral II, Jalan Stesen Sentral, 504070, Kuala Lumpur, Malaysia | **Website** <http://www.petraware.com/>

Junior Product Owner

31/05/2015 – 31/08/2016

- Worked as a product owner to deliver valuable Enterprise Content Management (ECM) solutions for recording, preparing, and automating banks' documents.
- Engaged client to gather software requirements/business rules, and ensure alignment with the development team.
- Identified the current- and future state of business processes.
- Worked with other Product Owners to understand the strategy and vision for the product, potential impacts, and opportunities in the environment.
- Worked within the team to describe the current baseline business architectures.
- Created, analyzed, and validated detailed functional specifications.
- Facilitated design sessions with the implementation team to define the solution.
- Delivered elements of systems design, including data migration rules, business rules, wireframes, or other detailed deliverables.
- Managed, coordinated, organized to execute projects, ensured that teams have appropriate product and technical specifications, directions, and resources to deliver products effectively via establishing realistic estimates for timelines while ensuring that projects remain on target to meet deadlines.
- Understood the system context, participated in the core activities (Documentation, elicitation, negotiation), and provided requirement artifacts by defining goals, scenarios, and solution-oriented requirements.
- Actively participated with the Executives in developing annual and ongoing corporate goals and developed the strategic and tactical initiatives to implement successfully.
- Created performance goals and objectives; tracking and communicating progress.
- Provided guidance to dedicated and matrix team to ensure goals and objectives are met.
- Prepared and conducted regular performance, evaluations, and corrective action plans.
- Provided goal modeling artifacts such as strategic dependency, and strategic rationale, and requirement modeling artifacts such as KAOS, UML, and tracing requirements.
- Identified functional and non-functional requirements, and prioritized requirements using AHP calculation.

Petraware Technologies Kuala Lumpur, Malaysia

Address No. 2, Level 21, Block 2A, Plaza Sentral II, Jalan Stesen Sentral, 504070, Kuala Lumpur, Malaysia | **Website** <http://www.petraware.com/>

Software Engineer

31/05/2014 – 31/05/2015

- Designing software architecture, codes, tests, modifies and debugs computer software applications.
- Supervising the development team and providing guidance, training, and ongoing communications to improve the quality/quantity of each individual's performance.
- Practicing Agile and Scrum methodology and sharing software engineering knowledge.
- Leading system development and maintenance.
- Program both new web solutions and functionalities in existing solutions, based on business needs, and using detailed functional designs.
- UI web design using HTML, JQuery, Json, Javascript, CSS, Bootstrap.
- Developing web applications using C# and ASP.Net.
- Developing and maintenance of database (SQL Server 2012).
- Compiling and writing documentation of program development and subsequent revisions.
- Consulting to clarify program intent, identify problems, and suggest changes; debugging, adapting, and modifying code and logic of existing applications.

- Developing and maintaining test standards relevant to the development of lifecycle and change management processes.
- Evaluating, selecting, integrating, and implementing new system architecture, tools, and techniques.

PowerComp Sdn Bhd Kuala Lumpur, Malaysia

Address Taman Bukit Emas, Petaling Jaya, Selangor Darul Ehsan, 47301, Kuala Lumpur, Malaysia | **Website** <http://www.powercompsoftware.com.my>

Software Engineer

31/07/2011 – 31/07/2012

- Designing a software interface for handhelds.
- Developing applications for the Casio handheld devices using C++ for Windows CE.
- Developing a desktop application using VB.Net & VB6.
- Developing and maintenance of database (SQL Server 2005/2008).
- Designing reports using Crystal Report.
- System Troubleshooting.
- Testing code to identify errors and debug.

APIIT Center of Technology and Innovation (CTI) Kuala Lumpur, Malaysia

Address Technology Park Malaysia, Bukit Jalil, 57000, Kuala Lumpur, Malaysia | **Website** <http://www.apu.edu.my/cti>

Internship

14/06/2009 – 09/05/2010

- Designing UI/UX for the client-side of the web application.
- Developing software applications using PHP / CSS.
- System Troubleshooting & debugging.
- Participating in software testing.

EDUCATION AND TRAINING

31/07/2012 – 30/04/2014 Kuala Lumpur, Malaysia

Software Engineering University Technology Malaysia (UTM)

- To apply image pre-processing techniques on 2D images in order to identify facial features.
- To apply the recognition techniques and algorithms for face verification.
- To appraise the proposed recognition framework success rate.

Website <http://www.sps.utm.my/> | **Final grade** 3.9 | **National classification** Master of Engineering | **Thesis** Enhancing performance of real-time face recognition system using PCA

31/12/2007 – 21/06/2011 Stoke-on-Trent, United Kingdom

Information Technology (IT) specialism in computing Staffordshire University

- To develop an intellectual decision-making parking management system.
- To select the suitable method and discuss variant graph theories, algorithms for finding the shortest path in the graph network.
- To develop a mobile application using windows Mobile 7 & Integrate it with Google Map for localizing and tracking available parking spaces and map routes.

Website <http://www.staffs.ac.uk/> | **Final grade** 2.8 | **National classification** Bachelor of Science (BSc (Hons)) |

Thesis Intelligent Parking Management System

LANGUAGE SKILLS

MOTHER TONGUE(S): Farsi

SKILLS

Good listener and communicator | Organizational and planning skills | Team-work oriented | Written and Verbal skills | Analytical skills | Critical thinking | Research and analytical skills | Good time management | Good Communication | positive thinking | leadership | Excellent organizational planning and solving problems in short time | Cross cultural skills | Friendly

PUBLICATIONS

Publications

- *Ubiquitous Computing For Security Enhancement Of Vehicles*, (IEEE International Conference) [can found [here](#)]
- *Applying Image Pre-processing Techniques For Enhancing The Performance Of Real-Time Face Recognition System Using PCA*, (Springer Book) [can be found [here](#)]
- **What Techniques Can Be Used for GUI Risk-based Testing?** (Scitepress International Conference on Software Technologies)[can be found [here](#)]

PROJECTS

Projects

- Postgraduate Thesis:
Enhancing Performance of Real-Time Face Recognition System Using PCA , pp 1-125 (Master of Engineering)
- Bachelor of Science Thesis:
Parking Management System using Windows Mobile, pp 1-194 (Bachelor of Science)

JOB-RELATED SKILLS

Job-related skills

Technical Skills

- Proficient Programming Language: C#, Python, JavaScript, JSON, HTML, CSS, XML, .NET, ASP, ASP.NET, Crystal Report
- Familiar Programming Language: C, C++, VB.Net, JAVA, R, Django

- Virtualization Technologies: VMware, Oracle Virtualbox.
- Big data Technologies: Hadoop, Pig, Hive, Sqoop, Spark.
- Operating Systems: Windows (Sever, 10), Linux (OpenSUSE, Ubuntu).
- Database: MS SQL Server(2008,2012), MYSQL, PostgreSQL.
- No-SQL Database: MongoDB.
- Extensive experience in the Administration, Installing, Configuring Apache 2.0/2.2,
- Administering Task Management & Source Control Tools: TFS, AccuRev, GitLab, Bitbucket, JIRA, Trello.
- Modeling Tools: Rational Rose, StarUML, Visual Paradigm, Visio.
- Development Methodologies: Agile, Scrum, Kanban, Waterfall.
- Proficient in Microsoft Office Suite.

CERTIFICATIONS

● Certifications

- Master of Software Engineering.
- Bachelor of Information Technology.
- Professional Scrum Master I (PSM I) ([Credential URL](#)).
- Scrum ([Credential URL](#))
- An Interactive Programming in Python ([Coursera](#)).
- Computing for Data Analysis ([Coursera](#)).

TRAINING

● Training

- Windows Server 2008 (*September 2008*).

ORGANISATIONAL SKILLS

● Organisational skills

- Proven skills in management, leadership, communication, and problem solving.
- Acknowledged for meeting company goals while maintaining excellent client relations.
- Met and exceeded quotas and accomplished delegated objectives.
- To get my ideas across clearly, engage and lead other people.
- Ability to institute creative improvements that allow for more efficient managing of the workflow.
- Accustomed to working with executive and senior-level management.
- Delivered highly motivated and effective performance in all area of management.
- Recognized for efficient and accurate management control methods.
- To be a pleasure to work in a group.
- Experience in scheduling; critical path analysis; earned value management; and using scheduling software such as Microsoft Project for managing tasks; collaboration; managing timelines; measuring progress; and generating reports.

COMMUNICATION AND INTERPERSONAL SKILLS

● Communication and interpersonal skills

- Being a good listener and communicator.
- Convey/respond to the messages/request sharply,precisely, clearly and directly.
- Friendliness, Having confidence, Respectful.
- Picking the right conversation medium.
